## EROSION CONTROL PRODUCTS

### **DustFloc™**

**DustFloc™** is a portable soil stabilizing system used to prevent fugitive dust. It is a proprietary blend of environmentally friendly, natural polysaccharides. **DustFloc™** can be used as a stand alone stabilizer or in conjunction with all hydro-mulches.

Once applied, the **DustFloc™** will congeal quickly and dry to form a crust on the soil surface, preventing wind erosion and resistant to limited rainfall conditions. It will provide good protection for fugitive soils and PM 10 sources. Use for landfills, road banks, construction sites, stockpiled topsoil, airport runway and taxiway shoulders, helipads and most slopes and berms where vegetation has not been established.

#### **Application Rate**

Flat to 5:1 slopes: 40 Lbs/acre  
5:1 to 4:1 slopes: 60 Lbs/acre  
4:1 or steeper: 80 Lbs/acre

**DustFloc™** is not designed for traffic areas. Not recommended on slopes steeper than 3:1.

#### **Packaging**

**DustFloc™** is available in heavy duty 50# (22.68 kg.) plastic

bags. **Mixing and Application Instructions**

Fill tank approximately 1/3 with water. Pour **DustFloc™** into the tank slowly. DO NOT DUMP.

**DustFloc™** should be applied at a rate to sufficiently wet the soil surface. Excess water should be avoided. Prevent puddling on the soil surface. Add hydromulch at 250 lbs. per acre as a tracer.

#### **Specifications**

The soil stabilizer shall be manufactured of environmentally friendly natural polysaccharides. Viscosity when mixed 60 Lbs with 1,000 gallons of water will be minimum 50 poise after 15 minutes at 73° F.
